Question/Comment	Action
Question: A Payer might have different approach, are we also trying to share this data with payers?	
No, not in scope of project. Payers would look at this different than providers.	
Looking at benchmarking with other states. Standardization and interpretation is of interest to HealthInsight and NRHI	
Payers are already looking at utilization and making comments	
Lynette said that many payers are moving to pay for performance model and are presenting information to the groups. They will have better understanding as they are starting to look at what their performance looks like payer by payer. Will help them compare this to other reports.
